SOFTWARE DEVELOPER

- Shopify Solutions Engineer at Helios Technology working across Hydrogen, Liquid and Admin GraphQL API with 3 software engineering co-ops building enterprise applications for Ontario Government
- Delivered government applications (frontend/backend), following best **AODA / WCAG 2.0 AA** practices
- Built a scalable React / Node / Express module for an e-commerce SaaS platform that **increased sales by 18%**
- Sheridan College Software Development & Network Engineering graduate (**3.89 Honors GPA**)

TECHNICAL SKILLS

Programming Languages: TypeScript / JavaScript (ES6+), C#, HTML/CSS, SQL

Shopify: Liquid, Hydrogen, Admin GraphQL / Storefront API, Shopify app development, Theme development

Frameworks and libraries: React.js, Next.js, Angular, ASP.NET, Docker, Node.js, Express.js

Database Management Systems: Microsoft SQL Server, MySQL, PostgreSQL, MongoDB, ORM, JPA

Technologies / Tools: Azure DevOps (Pipelines, Repos, Artifacts), CI/CD, AWS (EC2, scaling), Docker, Git, Linux

Testing / Accessibility: Jest, JUnit, Postman, NVDA screen reader, WCAG 2.0 AA / AODA Compliance, NUnit / XUnit, Playwright

Concepts and Competencies: SDLC, Agile/Scrum, SOLID, OOP, MVC, REST API, TDD, Microservices, JSON

WORK EXPERIENCE

Shopify Solutions Engineer

March 2026 – Present

Helios Technology Solutions Inc

- Delivered custom storefronts across Hydrogen (headless React) and Liquid, integrating Shopify GraphQL API for 20+ merchants
- Designed, built and deployed an internal QA platform for Shopify Data migrations (200k+ SKU's, 70k+ customer records per migration), leveraged by all 9 Migration Specialists and cutting validation/prep time from 4 hours to 1 (75%)
- Turned unserved client needs into three new billable services (Supplier & Purchase Orders migrations & product data scraping), generating \$20K+ in new revenue within 3 months

Co-op Developer

May 2025 – August 2025

Ontario Public Service – Ministry of Public and Business Service Delivery and Procurement

- Applied DevOps and Cloud knowledge managing CI/CD pipeline using Azure DevOps, incorporating Azure pipelines for build automation, version control Azure Repos, and Azure Artifacts for dependencies
- Integrated testing into ASP.NET Core application, using Microsoft SQL Server stored procedures for database development and testing, and jQuery for the client side
- Contributed to test automation using Playwright / Conducted regression testing
- Performed accessibility testing using NVDA screen reader to ensure WCAG 2.0 AA / AODA compliance

Co-op Jr. Programmer

September 2024 – December 2024

Ontario Public Service – Treasury Board Secretariat – Enterprise Applications Branch

- Exceeded manager expectations while working on an enterprise solution performing a variety of functions throughout the project lifecycle including analysis, development, testing, and implementation activities
- Supported BinderBrowser application with DEV / QA / UAT / PROD environments, participating in 2 production releases
- Followed development best practices including MVC patterns, SOLID principles and AODA compliance (WCAG 2.0 levels AA), to provide a meaningful user-friendly experience
- Collaborated with QA team and Senior Developers to resolve defects prior to release

Co-op Jr. Software Developer

January 2024 – April 2024

Skill Squirrel Career Launch Platform

- Led the development of a scalable subscription-based Portfolio Maker feature within a SaaS platform
- Implemented Jest tests following TDD, achieving 74% code coverage
- Participated in daily scrums with project updates, plans and obstacles; collaborated with CEO to translate business vision into product roadmap

EDUCATION

Software Development & Network Engineering Advanced Diploma

September 2022 - December 2025

Sheridan College, Oakville, Ontario

- Honors Cumulative GPA 3.89

PROJECTS

Rewards Platform / Full Stack Web App

March 2026

Angular / Spring Boot / PostgreSQL / REST API / Docker / Github Actions CI/CD

- Fully designed and built REST API with Spring Boot, integrating Angular frontend with backend involving CRUD and transactional redemption flows
- ORM data access using JPA / Hibernate with Flyway schema migrations across relational tables
- Unit and Integration testing using Karma / Jasmine and applied Agile practices including iterative delivery and feature / bug branching using Git

Capstone “Floor is Lava” AR Game

January 2025 – December 2025

Unity, AR Foundation, C#, Firebase, Docker, Git

- A mobile augmented reality game developed using Unity, with real-world floor recognition that turns surfaces into interactive elements of the gameplay.

ACTIVITIES & HACKATHONS

Hackville 2026 (Hackathon Participant)

January 2026

MongoDB, Express.js, React.js, Node.js

- Designed and pitched a full stack MERN software solution within a 24-hour hackathon (JWT auth)

Google Dev Tech Events (Volunteer)

January 2025

- Supported organization of technological events with a focus on accessibility for people with disabilities

Cloud Computing Competition (1st Place)

March 2024

AWS

- Configured and deployed EC2, security groups, NACLs, and implemented scaling up and out for cloud infrastructure
